

Team Name: sdmay21-49

Team Members: George Youngwirth, Rohan Gijare, Samuel Ferguson, David Gorzneg, Kathryn Blesi, Tabitha Kiiru

Report Period: Sept 28-Oct 11

### **Summary of Progress in this Period**

In this period, we got to test the components that we ordered. The components were very tiny so we had to send them to the ETG to get soldered onto a convertor board that will be useful for breadboard usage.

---

### **Pending Issues**

We would like to get a bit more testing done to ensure that these components will be what we are wanting them to be. Additionally we have to figure out which mcu we like.

---

### **Plans for Upcoming Reporting Period**

Finalize the selected components. Pick out what MCU we want to use based on the performance we get from arduino.
